

Achieving Project Success Through Best Practices

Join us in an insightful, focused and knowledge-rich conference that reveals **Project Management Best Practices for Information Technology Projects in Asia Pacific**, a region of diverse business practices and cultural background.

Today's businesses do not rely on one strategic project, but several parallel initiatives that must combine to meet business objectives. Whether you are confronted with issues of global importance or local challenges, **MASTERING IT PROJECT MANAGEMENT - Best Practices in Asia Pacific** can have an immediate and positive impact to your current or next project.

With decentralized and global work forces, projects must coordinate the efforts of multiple cross-functional teams, operating in different environments and geographic locations. Learn from our leading international IT Project Management practitioners who have successfully completed projects in the region.

We provide you with the opportunity to get in-depth with our speakers who will share their experiences with you in resolving **issues and challenges, the DO's and DON'Ts in software development, outsourcing, and mission and life critical system projects**. You will gain the insights on how the experts address critical success areas from managing project risks, cost, and human resources to meet key stakeholders' expectations.

The Conference is also an excellent opportunity for **networking and exchanging of valuable ideas and experiences with delegates and speakers from within the region**.

About us

ADVANCED TECHNOLOGY STUDIES CENTRE (atSC)

Advanced Technology Studies Centre or atSC was incorporated in July 2002 with the mission of being a Regional Centre of Excellence for the study and dissemination of knowledge, focusing in the areas of application of advanced technologies at work and in promoting the art and science of IT project management to the industry and the society as a whole.

As a leading business intelligent provider in the Asia Pacific Region, atSC principal charter is to meet the growing demand for advanced technological know-how in K-economy-centred business and also on the latest initiatives in project management development and the overall education for the advancement of businesses.

atSC, backed by a panel of advisers comprising regional leaders and industry captains in the fields of information technology put it in a position to envision industrial trends and envisage changes. www.atsc.org.my

MULTIMEDIA DEVELOPMENT CORPORATION (MDC)

has been given the mandate by the Malaysian Government for the coordination, promotion and development of the information communication technology (ICT) industry and selected services in the Multimedia Super Corridor (MSC) and Malaysia.

Incorporated under the Companies Act of Malaysia, owned and funded by the Government, MDC advises the Malaysian government on ICT legislation and policies, develops MSC-specific practices and sets world-class standards for the MSC's information infrastructure and urban development. In addition, MDC accelerates the growth of the MSC as a global ICT hub by attracting world class companies and nurturing Malaysian SMEs, globally markets the MSC and works with government entities and private organizations to ensure that the MSC continues to be the nucleus for innovation in the region for the creation of outstanding ICT products, solutions

and services. As a performance-oriented, client-focused agency, MDC facilitates applications for MSC-status, assists in expediting permit and license approvals, and introduces companies to financiers and high-value business partners.

MDC has overseas offices in Dalian (China) and Jeddah (Saudi Arabia). MDC is also represented by all Malaysian Embassies, MATRADE and MIDA offices worldwide. www.mdc.com.my

MALAYSIAN NATIONAL COMPUTER CONFEDERATION (MNCC)

MNCC is a confederation dedicated to the development of IT Professionals and the creation of an Information Rich Society. First established in 1967, MNCC is recognized as the IT professional body in Malaysia and its mission is to achieve global competitive advantage through IT Professional excellence. MNCC is a member of the International Federation of Information Processing and South East Asia Regional Computer Confederation (SEARCC). www.mncc.com.my

PROJECT MANAGEMENT INSTITUTE MALAYSIA CHAPTER (PMIMY)

PMIMY is the local chapter of Project Management Institute (PMI), a non profit organisation set up to promote standards for the practice of project management worldwide. The Chapter was founded in 1994, established under the strong interest raised during the development of the country's KLIA and KLCC mega projects. The objective of PMIMY is to promote the art and science of project management in Malaysia, inculcate awareness of the benefit/significance of project management in the industry. www.pmimy.org
